

Fleet Management System for Concrete Pump Service Provider

Putzmeister

Advantages

- Optimum equipment utilisation
- Rapid order processing
- Low administration costs
- Data evaluations
- Flexibility
- Cost savings
- High transparency

The PM-DAISY XP, a modular, integrated system, is interesting and usable for all concrete pump service providers with a fleet of vehicles.

Differing software versions and interfaces allow fully individual solutions, according to size and requirements of the company.

Application

- Preparation and administration of orders, offers, delivery notes, invoices and credit notes
- Financial accounting interface
- Equipment scheduling
- Administration of personnel time-keeping and incentive wage management
- Monitoring of inspection intervals
- Different evaluations
- Indication of equipment and construction sites on map
- Route finding and calculation
- Vehicle location via GPS

A vehicle equipment is offered in order to connect the vehicles with the head office (scheduling). In this case, the available order data and construction site status of the vehicle are transmitted via radio data transmission (GPRS) to the head office.

Hardware

Monitor

On-board computer, monitor, keyboard, printer

The Putzmeister Group

Concrete Technology PCT · Mortar Technology PMT
Pipe Technology PPT · Water Technology PWT
Industrial Technology PIT · Belt Technology PBT
Underground Technology PUC
